github.com/AnasGhnaim

Frontend Engineer building React and React Native products for web and mobile. At Dynamic Innovations Technology, delivered 2 web platforms and 3 mobile apps integrated with Microsoft Dynamics 365 CRM, including a bilingual (English/Arabic) investor portal, and owning the web and mobile frontend of Qawi, a gym management SaaS. Strong in TypeScript, frontend architecture, server state (TanStack Query), client state (Zustand, Redux Toolkit), and schema-validated forms (React Hook Form + Zod). Comfortable across the stack with Express.js and SQL/NoSQL databases.

SKILLS

Languages
JavaScript (ES6+) · TypeScript · SQL · Java

Frontend
React · Next.js · Vite · HTML5 · CSS3 · Tailwind CSS · shadcn/ui · Radix UI · Bootstrap · Framer Motion

Mobile
React Native · Expo · NativeWind

State & Data
TanStack Query · Zustand · Redux Toolkit · REST APIs · Axios / Fetch

Forms & Validation
React Hook Form · Zod (conditional / multi-step schemas)

Backend & Integrations
Node.js · Express.js · Microsoft Dynamics 365 CRM / Dataverse

Databases
PostgreSQL · MongoDB · Oracle

Tools
Git & GitHub · Vercel · Docker · npm / pnpm / bun

EDUCATION

Bachelor's Degree, Computer Information Systems (CIS)
University of Jordan, Amman | 10/2021 – 06/2025

COURSES

- Learn Next.js 15: Full-stack React + Next.js (App Router & Pages Router)
- Mastering Queries, Mutations, Authentication, and Testing
- Redux from Scratch: Core, Redux Toolkit, and react-redux
- Learn JavaScript from Scratch (incl. Webpack & React)
- React – The Complete Guide 2025 (incl. Next.js & Redux)
- The Complete Full-Stack Web Development Bootcamp

EXPERIENCE & PROJECTS

Frontend Developer — Dynamic Innovations Technology Present

- Delivered 2 web platforms and 3 mobile applications for enterprise clients using React, React Native (Expo), and TypeScript, integrated with Microsoft Dynamics 365 CRM / Dataverse.
- **ADC Investor Journey Portal:** sole frontend developer on a bilingual (EN/AR, RTL) investor onboarding portal for Aqaba Development Company, built from scratch with lazy-loaded protected routes and a shared API client.
- Built multi-entity registration with React Hook Form + Zod and split server/client state with TanStack Query and Zustand.
- **White-label CRM product:** reusable web platform and React Native (Expo) app with a per-client theme layer, shipped as Deirah, Marafid (platform + app), and Riyadh Holding (app).
- Implemented CRM-backed authentication and biometric (Face ID / fingerprint) login, shared across all client builds.

Frontend Developer (Web & Mobile) — Qawi, Gym Management SaaS

- Own the full frontend of a SaaS platform serving gym owners, staff, and members on web and mobile, including UI design, state management, and form validation.
- Build gym-management features and manage application and server state to keep data consistent across screens; implement validation logic for reliable data entry platform-wide.

React Frontend Developer Intern — MBC (Shahid)

- **Movie Hub:** React app with efficient data fetching and caching via React Query and global state via Redux; clean, reusable components.
  GitHub: github.com/AnasGhnaim/Intern-Project1
- **Trello Clone:** TypeScript Kanban app with an Express backend and React (Vite) frontend; RESTful APIs via Axios, Redux for client state, React Query for server state.
  GitHub: github.com/AnasGhnaim/my-trello-clone

Oracle Developer Intern — FACT (Future Applied Computer Technology)

- Developed and maintained applications using Oracle Forms and Oracle Reports; applied SQL for database design and optimization.

Graduation Project — ILM-VERSE (Learning Management System)
Full-Stack Developer · Team Project · Thinking Flares School

- Full-stack LMS with multi-role access (students, teachers, admins, parents), secure authentication, and role-based authorization.
- Built assignments, quizzes, automated grading, analytics-driven progress tracking, and a parent portal for performance and attendance insights.
  GitHub: github.com/MohamadAbudraiea/ILM-Verse

Freelance — AL-Kharouf Suits
Full-Stack Developer · Team Project

- Live tailoring platform for a bespoke suit business built with TypeScript, React, and Express.js; Zustand for client state, React Query + Axios for server state.
- Delivered product catalog, custom orders, and suit-management workflow for a production environment.
  Live: al-kharouf.com

Freelance — Alameer Paper
Frontend Developer

- Responsive portfolio website built with React and TypeScript, using a modular component architecture and type-safe code.
  Live: alameerpaper.com
