<https://github.com/AnasGhnaim> 

Motivated Software Developer with experience in front-end, mobile, and back-end development. Proficient in HTML, CSS, JavaScript, Java, and experienced with React, Bootstrap, and Tailwind for building responsive, user-friendly applications. Strong knowledge of OOP, Node.js, Express.js, and database management with MySQL, PostgreSQL, MongoDB, and Oracle. Developed the GYMBros fitness app and Recipe app with React Native, delivering intuitive, functional, and clean UIs. Passionate about creating user-centric solutions and expanding expertise in mobile development, back-end systems, and UI/UX design

SKILLS/QUALIFICATIONS

Object Oriented Programming |

offering strong foundation in software engineering, problem solving and programming across multiple platforms, good knowledge in object oriented programming.

Programming Languages |

- Dart
- JavaScript
- Java
- Type Script

Front-End Development |

- Bootstrap
- HTML
- CSS
- Tailwind
- React
- React Native
- Next Js

Back-end-Development |

- Express.js.
- NodeJS

Database Management |

- PostgreSQL
- MongoDB
- Oracle

EDUCATION

Bachelor's Degree, Computer Information Systems (CIS)
University of Jordan, Amman | 10/2021-06/2025

Courses:

- Learn NextJS 15: Build full-stack ReactJS + NextJS apps (App Router & Pages Router).
- Mastering Queries, Mutations, Authentication, and Testing.
- Redux from Scratch: Core, Redux Toolkit, and react-redux.
- Learn JavaScript from Scratch (Includes Webpack & React).
- React – The Complete Guide 2025 (incl. Next.js & Redux).
- The Complete Full-Stack Web Development Bootcamp.

Work History/Projects

React Frontend Developer Intern at MBC (Shahid)

October 2025-January 2026

- **Movie Hub project** : Developed web application using React, implementing efficient data fetching and caching with React Query and managing global state with Redux. Built clean, reusable components and followed modern frontend best practices.

GitHub Repository: <https://github.com/AnasGhnaim/Intern-Project1>

- **My trello clone project**: Built a Trello-style task management app using TypeScript, with an Express backend and React (Vite) frontend. Implemented RESTful APIs consumed via Axios, and created an interactive Kanban UI using Redux for client-state and React Query for optimized server-state handling. Delivered a clean, type-safe architecture with smooth, responsive user experience.

GitHub Repository: <https://github.com/AnasGhnaim/my-trello-clone>

Oracle Developer Intern at FACT (Future Applied Computer Technology)

April 12 2025 – May 6 2025

- Developed and maintained applications using Oracle Forms and Oracle Reports.
- Studied and applied comprehensive SQL concepts for database design and optimization.

Graduation Project: ILM-VERSE (Information Lifecycle Management)

Role: Full-Stack Developer — Team Project

Project Description: a full-stack Learning Management System (LMS) built for Thinking Flares School as a graduation project. Implemented multi-role access for students, teachers, admins, and parents with secure authentication and role-based authorization. Built modules for assignments, quizzes, automated grading, and analytics-driven progress tracking. Designed a parent portal for real-time performance and attendance insights. Engineered a scalable architecture with clean API integration and modular front-end components. Ensured a reliable, maintainable codebase following best practices in full-stack development.

GitHub Repository: <https://github.com/MohamadAbudraiea/ILM-Verse.git>

Freelance Project (AL-kharouf suits)

Role: Full-Stack Developer — Team Project.

Project Description: live full-stack tailoring web application for a bespoke suit business. Implemented with TypeScript, Express.js backend, and React frontend, using Zustand for client-side state and React Query / Axios for server-state/data fetching and API integration. Developed core features including a product catalog, custom orders, suit-management workflow, and secure customer interactions. Delivered a responsive, user-friendly interface and robust backend services for real-world deployment. Ensured clean, maintainable, type-safe code and smooth user experience for a live production environment.

Live at: <https://al-kharouf.com/>

Freelance Project (Alameer Paper)

Role:Portfolio (Frontend)

Project Description:Developed a personal portfolio website using TypeScript and React, showcasing projects, skills, and experience. Implemented a clean, modular component architecture and responsive design for optimal viewing across devices. Focused on type safety, maintainable code, and smooth user interactions to highlight professional work effectively.
